The sermons and songs may be in Korean, but the level of passion expressed in worship at [Yuong-Sang Presbyterian Church](#) easily matches that of any other dedicated church service in America. The excitement level recently kicked up a notch when Yuong-Sang, located in the Philadelphia suburb of Horsham, invested in a new sound system anchored by Meyer Sound MINA line array loudspeakers.

"MINA delivers the power and the clarity the church needs, but in a compact box that blends with the look of their remodeled sanctuary."

- Dave Brotman  
Owner, DBS Audio Systems, Inc.

"MINA is a perfect fit for Yuong-Sang in both size and performance," says Dave Brotman, owner of Coatesville, Pa.-based systems integrator [DBS Audio Systems, Inc.](#) "Yuong-Sang has a very active music program, with services including a band, orchestra, and 100-voice choir. MINA delivers the power and the clarity the church needs, but in a compact box that blends with the look of their remodeled sanctuary."

The custom-painted Meyer Sound system includes left and right arrays, comprised of six MINA loudspeakers flown under a 500-HP subwoofer on each side. Five UPJ-1P VariO loudspeakers are spaced along the rear of the sanctuary as balcony delays, and six MM-4XP self-powered loudspeakers are recessed in the stage steps to provide front fill and lower the perceived audio image.

"The church already had expressed a preference for a Meyer solution based on the senior pastor's experience at other churches," Brotman explains. "They were looking at a [M'elodie](#) [line array loudspeaker] system, but by using MAPP Online Pro [acoustical prediction program], I showed them that the more compact MINA would give them all the performance and coverage they needed—and save them a substantial amount of money."

The Meyer Sound loudspeaker system installed at Yuong-Sang is self-powered, therefore requiring only two additional items to complete the setup: a Galileo loudspeaker management system with one Galileo 616 processor and a 48V, DC MPS-488HP power supply for the MM-4XP loudspeakers. A new [Allen & Heath](#) iLive digital console has also been installed.

As part of the church's complete renovation, [Applied Video Technology, Inc.](#) (AVT) in Malvern, Pa. supplied new video systems, including [Digital Projection](#) projectors, [NEC](#) monitors, [Panasonic](#) cameras, a [Sony](#) HD production switcher, and [Crestron](#) controls.

One of the largest Korean-language churches in the Northeast, Yuong-Sang Presbyterian draws its congregation from Korean-American communities throughout the greater Philadelphia area.
